1 Apr 2015 18:45:15 NotificationCenter[272]: Layout still needs update after calling -(UIView layout).
UIView or one of its superclasses may have overridden -layout without calling super. Or, something
may have dirtied layout in the middle of updating it. Both are programming errors in Cocoa
Autolayout. The former is pretty likely to arise if some pre-Cocoa Autolayout class had a method
called layout, but it should be fixed.
