

How to choose the part of the image to be used by Notification Center

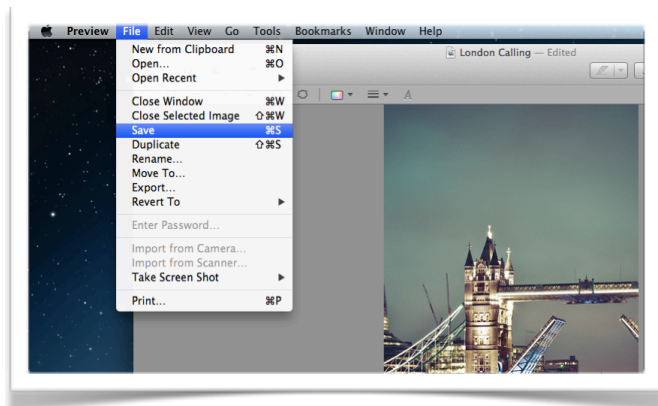

Step 1:
Open with Preview, the image that you want to use.

Step 2:
Select the part of the image that you like. You can do this by clicking and dragging over the part of the image that you like.

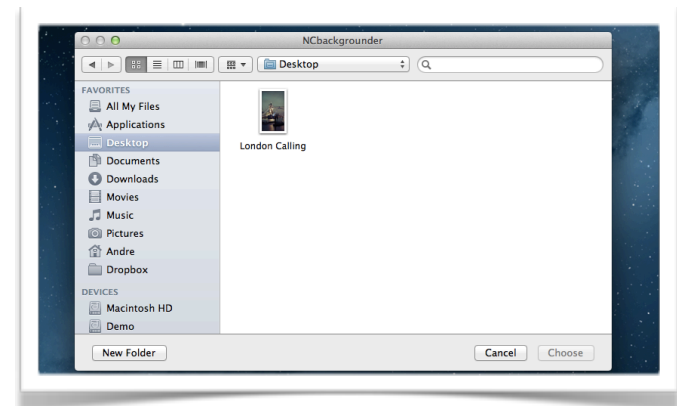

Step 3:
After you have selected the part of the image that you want, you need to crop it. You can do that by going to the Tools tab and select Crop, or just press ⌘K.

Step 4:
Save the image, and quit
Preview.

Step 5:
Go to your Applications
folder, and launch
NCbackgrounder.

Step 6:
Now, just click on the
custom background button,
and point to the image that
you cropped. That is all,
thanks for using
NCbackgrounder!
